Applicant:	Jeffrey Schindler et al.	Examiner:	Unknown
Serial No.:	Unknown	Group Art Unit:	Unknown
Filed:	Herewith	Docket:	450.026US4
Title:	GRAPHICAL USER INTERFACE FOR CONTROL OF A HOME ENTERTAINMENT SYSTEM (Continuation under 37 CFR 1.53(b) of Serial No. 08/503,119, filed July 17, 1995)		

---

**PRELIMINARY AMENDMENT**

Commissioner for Patents  
Washington, D.C. 20231

Prior to Examination, please amend the above-identified continuation application as follows.

**In the Specification**

On page one, please change the title to read as follows:

--COMPUTER USER INTERFACE FOR PRODUCT SELECTION--.

On page 1, after the title, please insert the following section:

--RELATED APPLICATIONS

This is a continuation under 37 C.F.R. 1.53(b) of U.S. Application Serial No. 08/503,119, filed July 17, 1995, which application is incorporated herein by reference.

This application is also related to the following co-pending, commonly assigned applications:

U.S. Application Serial No. 09/129,207, filed August 4, 1998, titled SYSTEM WITH ENHANCED DISPLAY OF DIGITAL VIDEO (Schindler et al.) (Atty. Docket No. 450.026US2); and

U.S. Application Serial No. 09/129,449, filed August 4, 1998, titled A SYSTEM PROVIDING DATA QUALITY DISPLAY OF DIGITAL VIDEO (Schindler et al.) (Atty. Docket No. 450.026US3).--

**In the Claims**

Please cancel claims 1-19 without prejudice or disclaimer.

Please add the following new claims 20-51:

20. (New) A system comprising:  
a cursor control device;  
a display having a screen for viewing by users;  
a processor for receiving cursor control information from the cursor control device and controlling the position of a cursor on the display;  
at least one cell identifying material displayed on said display by the processor; and  
a buy icon displayed on the display by the processor and operable to cause the processor to obtain the material identified by a cell that is dragged and dropped onto the buy icon.
21. (New) The system of claim 20 wherein the material is a product offered for sale.
22. (New) The system of claim 21 wherein the product is a computer program.
23. (New) The system of claim 21 wherein the product is a video program.
24. (New) The system of claim 20 wherein an expanded version of the cell is provided by clicking on the cell with the cursor control device.
25. (New) The system of claim 20 and further comprising multiple cells identifying programming associated with multiple channels.
26. (New) The system of claim 20 and further comprising multiple cells representative of products in a catalog of products.
27. (New) A system comprising:  
means for controlling a cursor;

means for displaying information to users;

means for receiving cursor control information and controlling the position of a cursor on the display;

means for identifying material displayed on said display by the processor; and

a buy icon displayed on the means for displaying information and operable to cause the user to purchase the material identified by the means for identifying material that is dragged and dropped onto the buy icon.

28. (New) The system of claim 27 wherein the material is a product offered for sale.

29. (New) The system of claim 27 wherein an expanded version of the means for identifying material is provided by selecting the means for identifying material with the cursor control device.

30. (New) The system of claim 27 wherein the means for identifying material displayed on the display comprises multiple cells representative of products in a catalog of products.

31. (New) A method of purchasing material displayed on a computer system, the method comprising:

controlling a cursor;

displaying information to users;

receiving cursor control information and controlling the position of a cursor on the display;

identifying material by a cell displayed on said display by the processor;

displaying a buy icon; and

causing the user to purchase material identified in a cell that is dragged and dropped onto the buy icon.

32. (New) The method of claim 31 wherein the material is a product offered for sale.

33. (New) The method of claim 31 wherein the product is a computer program.
34. (New) The method of claim 31 wherein the product is a video program.
35. (New) The method of claim 31 wherein an expanded version of the cell is provided by clicking on the cell with the cursor control device.
36. (New) The method of claim 31 wherein multiple materials are identified by multiple cells associated with multiple channels.
37. (New) The method of claim 31 wherein multiple cells identify multiple products in a catalog of products.
38. (New) A system comprising:  
a cursor control device;  
a display having a screen for viewing by users;  
a processor for receiving cursor control information from the cursor control device and controlling the position of a cursor on the display; wherein the processor causes purchase of material in a cell that is dragged and dropped onto the buy icon.
39. (New) A computer readable medium having instructions to cause a computer to perform a method of purchasing material displayed on a computer system, the method comprising:  
controlling a cursor;  
displaying information to users;  
receiving cursor control information and controlling the position of a cursor on the display;  
identifying material by a cell displayed on said display by the processor;  
displaying a buy icon; and  
causing the user to purchase material identified in a cell that is dragged and dropped onto the buy icon.

40. (New) A computer implemented method of buying material, the method comprising:  
using a cursor control device to identify a cell on a display device, the cell containing a description of the material; and  
dragging the identified cell onto a buy icon, causing the material to be selected for purchase.

41. (New) A computer implemented method of buying material, the method comprising:  
detecting selection of a cell on a display device, the cell containing a description of the material; and  
detecting that the identified cell is dragged and dropped on to a buy icon, causing the material to be selected for purchase.

42. (New) Apparatus for controlling display of information on a computer system, the apparatus comprising:  
a cursor control device;  
a display having a screen for viewing by users;  
a processor for receiving cursor control information from the cursor control device and controlling the position of a cursor on the display;  
at least one cell identifying material displayed on said display by the processor; and  
a buy icon displayed on the display by the processor and operable to cause the processor to obtain the material identified by a cell that is dragged and dropped onto the buy icon.

43. (New) Apparatus for controlling material displayed on a home entertainment system, comprising:  
a cursor control device;  
a display having a screen for viewing by users;  
a processor for receiving cursor control information from the cursor control device and controlling the position of a cursor on the display;  
at least one cell of video program information associated with a video program, displayed on said display by the processor;

10026763-10001

a record icon displayed on the display by the processor;  
a recording device coupled to the processor for recording the video program associated with the cell when the cell is dragged and dropped by the cursor control device onto the record icon; and  
a buy icon displayed on the display by the processor and operable to cause the processor to obtain the material identified by a cell that is dragged and dropped onto the buy icon.

44. (New) The apparatus of claim 43 wherein said material is a product offered for sale.

45. (New) Apparatus for controlling material displayed on a home entertainment system, comprising:

a cursor control device;  
a display having a screen for viewing by users;  
a processor for receiving cursor control information from the cursor control device and controlling the position of a cursor on the display;  
at least one cell of video program information associated with a video program, displayed on said display by the processor;  
a record icon displayed on the display by the processor; and  
a recording device coupled to the processor for recording the video program associated with the cell when the cell is dragged and dropped by the cursor control device onto the record icon.

46. (New) The apparatus of claim 45 and further comprising:

a buy icon displayed on the display by the processor and operable to cause the processor to obtain the material identified by a cell that is dragged and dropped onto the buy icon.

47. (New) The apparatus of claim 46 wherein said material is a product offered for sale.

48. (New) The apparatus of claim 45 and further comprising:

a picture in picture icon displayed on the display by the processor and operable to cause the processor to display a video program in a window located in a predetermined portion of the display screen.

49. (New) Apparatus for controlling the material displayed on a personal computer home entertainment system, comprising:

a plurality of remote control devices for providing command signals;

a personal computer further comprising:

a processor;

a main memory;

a bus connecting the processor to the main memory;

a display adapter coupled to the bus;

a display driven by the display adapter;

a circuit coupled to the bus for receiving signals from the plurality of remote control devices and decoding the signals to determine the commands, including cursor control signals, wherein the processor receives the cursor control information from the cursor control device and controls the position of a cursor on the display;

at least one cell representative of a product for purchase by a user and

a buy icon viewable by a user on the display for causing purchasing of products represented by cells dragged and dropped onto the buy icon by the user.

50. (New) The apparatus of claim 49 wherein said material is a product offered for sale on a shopping network program.

51. (New) An icon driven interface for controlling application and video programming on a home entertainment system comprising:

a first set of cells associated with products, the cells being displayed on a display screen;

a second set of cells associated with computer application programs on a display screen;

a first set of icons on the display screen separate from the cells, and associated with functions to be performed related to the first set of cells;

PRELIMINARY AMENDMENT

Serial Number: Unknown

Filing Date: Herewith

Title: GRAPHICAL USER INTERFACE FOR CONTROL OF A HOME ENTERTAINMENT SYSTEM

Page 8

Dkt: 450.026US4

a cursor controllable by a user of the home entertainment system; and  
a cursor control device for moving the cursor, and controlling the cursor to perform dragging and dropping of the cells on said icons to cause the system to perform the associated functions, and to select application programs from said second set of icons for execution on the system.

Remarks

Claims 1-19 have been cancelled; claims 20-51 have been added. Claims 20-51 are pending.

The specification has been amended to change the title and to add a section identifying the parent and co-pending applications.

The Examiner is invited to telephone Applicants' representative at 612-373-6972 if there are any questions or if prosecution of this application may be assisted thereby.

Respectfully submitted,

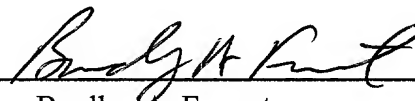

JEFFREY SCHINDLER ET AL.

By their Representatives,

SCHWEGMAN, LUNDBERG, WOESSNER &  
KLUTH, P.A.
